## Front-End Developer

### Summary

I am a Front-End developer studying web development since 2022. I am looking for a permanent job in a company, the direction of which to make everyday life and business easier, more productive and more convenient. I have experience working with frameworks like React.js and Angular. Currently I am deepening my knowledge of Angular and in the near future I plan to learn Python. Despite the lack of experience in commercial projects, I have almost experience working in a group. Agile/Scrum methodology I am fast learning, responsible and ready for challenging tasks.

### Projects

**1. Ice Cream** [Link]

Project Description: The IceCream project is a team website designed to demonstrate web development skills. The site is a one-page application that offers the user an interactive interface to get acquainted with the products of the fictional company IceCream. My role is work with section "Product catalog".

Functional: Home page, Product catalog, Modal windows, Feedback form, Animation, Adaptive design.

Main stack of technologies: HTML, CSS/SASS, Flexbox, Grid, JavaScript, Parcel, Git

**2. Filmoteka** [Link]

Project description: Filmoteka is a web application for searching movies and managing your favorites. It provides users with a convenient interface to view information about the films, including descriptions, posters, ratings and trailers. The project was implemented in teamwork to develop skills of user interfaces, working with API and project management. My role is work with localStorage and data processing on the "My Library" page.

Functional: Movie search, Movie cards, Modal window, Add to favorites, Pagination, Adaptive design.

Main stack of technologies: HTML, CSS/SASS, JavaScript, Axios, Parcel, Git.

**3. Image Finder** [Link]

Project description: Image Finder is a web application for searching images based on user requests. The project was developed as part of a homework with React. The main task is to implement the functional components, hooks and state management in React.

Functional: Image search, Image gallery, Mode window, Pagination, Load.

Main stack of technologies: React.js, React Hooks, Axios, CSS Modules, PropTypes.
